ADERTONDE BANDETS INNEHÅLL

		Sid.
1.	WETTERMARK, G., High intensity photolysis studies of acetone and some aliphatic aldehydes	1– 78
2.	LAMM, B., Studies in nucleophilic aromatic substitution reactions. I. Replacement of bromine and chlorine in 4-halo-3-nitrobenzenediazonium ion by chloride ion	79– 93
3.	SENNING, A. und LAWESSON, S.-O., Beiträge zur Chemie α-substituierter Sulfide. VI. Über Alkyliden-bis-(*o*-karboxyphenylsulfide)	95–100
4.	FISCHMEISTER, I., Infrarotspektren sämtlicher stellungsisomerer Monohydroxy- und Monoketo-oktadekansäuren und deren Methylester. I. Monoketo-oktadekansäuremethylester	101–114
5.	WAHLBERG, E., Über 1-acetyl-5-pyrazolon-3-carbonsäureäthylester	115–117
6.	MOSES, P. and GRONOWITZ, S., On the transformations of unstable thienyllithium compounds	119–132
7.	GRONOWITZ, S., HÖRNFELDT, A.-B., GESTBLOM, B. and HOFFMAN, R. A., On the coupling constants of pyrroles	133–142
8.	BERGSON, G. and BIEZAIS, A., Synthesis of 1-thia-2-selena-cyclopentane-4-carboxylic acid	143–149
9.	GRONOWITZ, S., HÖRNFELDT, A.-B., GESTBLOM, B. and HOFFMAN, R. A., On the structure of the thiocyanation products of pyrrole	151–163
10.	ARRHENIUS, S., An ellipsoid fluorimeter	165–172
11.	FORSSBERG, A., DREYFUS, G. and HEVESY, G., The labelling of nucleic acids in tissue cells	173–178
12.	RYHAGE, R., STÄLLBERG-STENHAGEN, S. and STENHAGEN, E., Mass spectrometric studies. VII. Methyl esters of α,β-unsaturated long-chain acids. On the structure of C_{27}-phtienoic acid	179–194
13.	MELANDER, L., Acid-induced aromatic hydrogen exchange. VI. Discussion of the kinetic isotope effect	195–211
14.	GRONOWITZ, S. and JÄGERSTEN, B., On an anomalous Hoesch synthesis	213–221
15.	BLOMBÄCK, B., BLOMBÄCK, M. and STRUWE, I., Studies on blood clotting factor VIII	223–225
16.	BROWN, W., Hydroxyethyl cellulose. A study of its macromolecular properties in solution	227–284
17.	VON EULER, H., VON EULER, B. und HASSELQUIST, H., Studien über den Effekt von Wirkstoffen an grünen Pflanzen und an Tumoren	285–289
18.	BERGGÅRD, I., Proteins, glycoproteins and mucopolysaccharides in normal human urine. I. Fractionation of non-dialyzable materials by ultrafiltration and by zone electrophoresis	291–313
19.	BERGGÅRD, I., Proteins, glycoproteins and mucopolysaccharides in normal human urine. II. Further zone electrophoretic studies on non-ultrafilterable materials	315–326
20.	HENLEY, D., A macromolecular study of cellulose in the solvent *Cadoxen*	327–392

Sid.

21. Dinh-Nguyên, N., Ryhage, R., Ställberg-Stenhagen, S. and Stenhagen, E., Mass spectrometric studies. VIII. A study of the fragmentation of normal long-chain methyl esters and hydrocarbons under electron impact with the aid of deuterium-substituted compounds 393–399
22. Teorell, T., Oscillatory electrophoresis in ion exchange membranes . . 401–408
23. Bergson, G., A semi-empirical study of the interaction between lone-pair electrons with special reference to the problem of hybridization and the theory of restricted rotation about single bonds. Applications to the structure and reactivity of sulphur chains 409–434
24. Abrahamsson, S., Fischmeister, I. and Svennerholm, L., The formation of solid solutions by mixtures of sialic acids and their identification by infra-red spectroscopy 435–440
25. Bergson, G. and Delin, A.-L., Some aspects on β-ketoselenides and related compounds. With a discussion of the complications in the formation of carbon–sulphur and carbon–selenium bonds 441–459
26. von Euler, H., Hasselquist, H. and Larsen, A., Versuche zur Synthese von Oligo-Nukleotiden 461–465
27. Raźnikiewicz, T., Resolution and absolute configuration of the 2- and 3-isomers of α-methoxy-thienylacetic acids 467–472
28. Stjärne, L., Catechol amine effects on the turnover of adenosinetriphosphate in cat and dog blood cells 473–477
29. Ingri, N. and Lundgren, G., On the crystal structure of $Na_4Ge_9O_{20}$ . . 479–487
30. Bergson, G. and Delin, A.-L., Perturbation of the carbonyl group by a divalent sulphur atom 489–499
31. Fredga, A., Studies on synthetic growth substances. XIV. Resolution and absolute configuration of 4-bromophenoxypropionic acid 501–504
32. Bergson, G., 4-(Aminomethyl)-1,2-dithiolane 505–512
33. Gronowitz, S. and Gestblom, B., Proton magnetic resonance of thiophenes. XI. On the chemical shifts of the methyl group protons in substituted methylthiophenes 513–519
34. Kierkegaard, P., On the crystal structure of $MoO_2(PO_3)_2$ 521–532
35. von Euler, H., Hasselquist, H. und Larsen, A., Spaltungen der Desoxyribo-Nukleinsäure durch Ameisensäure 533–540
36. Wallén, J., Brosset, C. and Vannerberg, N.-G., The crystal structure of $[Pt(NH_3)_2Br_2]\,[Pt(NH_3)_2Br_4]$, $[(Pd,Pt)(NH_3)_2Cl_2]\,[(Pd,Pt)(NH_3)_2Cl_4]$ and $[Pd(NH_3)_2Cl_2]\,[Pd(NH_3)_2Cl_4]$ 541–551
37. Kierkegaard, P., The crystal structure of $NaWO_2PO_4$ and $NaMoO_2PO_4$ 553–575
38. Hedbom, A., Amino acid determinations used as a supplement to the solubility and phase distribution criteria for demonstration of the homogeneity of proteins and polypeptides 577–582
